### PROFILE

---

Full Stack Developer with 4 years of experience building end-to-end solutions: data model, services and interface. I have worked fully remotely since my first job, in distributed teams where written communication, self-organization and incremental delivery keep the work moving. I focus on clean, scalable code backed by automated tests, and I rely on AI assistants in my daily work to speed up implementation without giving up technical judgment or review. I am looking for a team where I can take on new technical challenges and contribute to projects with real impact.

### PROFESSIONAL EXPERIENCE

---

#### Full Stack Developer | Stac Los Cabos — Mysis

Dec 2025 – Present

*Remote · Chiapas, Mexico — held concurrently with the SAO Insurtech role*

- Built a multi-company desktop point-of-sale system from scratch: a central configuration database plus a separate database per company, using EF Core 9 and SQL Server.
- Designed a feature-based architecture with layer separation (Domain, Application, Infrastructure, Presentation) and dependency injection, covered by unit tests and end-to-end UI tests.
- Implemented CFDI 4.0 electronic invoicing: generation, digital signing, tax authority certification, PDF rendering and credit notes.
- Built the application design system — styles, light and dark themes and reusable components — to keep every screen consistent.

Tech stack: C# 13, .NET 9, WinUI 3, EF Core 9, SQL Server, MVVM, xUnit, NSubstitute, FlaUI

#### Backend .NET Developer | SAO Insurtech — SACS Copilot

Jan 2026 – May 2026

*Remote · Chiapas, Mexico — held concurrently with the Mysis project*

- Designed and implemented the base architecture of the platform, including the configuration required for its deployment and operation.
- Integrated security with Keycloak: centralized authentication, role and permission management.
- Migrated and adapted existing services into the new platform, with service-to-service communication over gRPC.

Tech stack: C#, .NET, Keycloak, gRPC, SQL Server

#### Full Stack Developer | Stac Los Cabos — Xiphias

Jan 2024 – Mar 2025

*Remote · Chiapas, Mexico*

- Led the migration of the system to newer .NET versions, ensuring compatibility and optimizing the existing codebase.
- Fixed business logic bugs in the point-of-sale flow and delivered the features requested by the client, improving the stability and accuracy of sales processes.
- Developed the purchasing module and the PDF and Excel reports used in daily operations.

Tech stack: C#, ASP.NET, SQL Server, JavaScript, SCSS, QuestPDF, EPPlus

#### Backend Developer | DSoft Solution — IIA-PROJECT

Sep 2023 – Dec 2023

*Remote · Chiapas, Mexico*

- Developed the endpoints to manage students, courses and payments with a scalable structure.
- Implemented the routes for roles, schedules and payment methods, with JWT authentication.

Tech stack: Node.js, Express, Prisma, PostgreSQL, JWT

## SELECTED PROJECTS

---

- **Mysis POS** — multi-company point-of-sale for Windows with built-in electronic invoicing. (C# 13, .NET 9, WinUI 3, EF Core 9)
- **PosLite** — point-of-sale for a grocery store, built end to end: from the data model to the installer. (.NET 9, WinUI 3, SQLite)
- **SACS for insurance brokers** — new features across implementations for several clients in the insurance sector. (ASP.NET, T-SQL, TypeScript)
- **Policard** — digital student ID platform for Universidad Politécnica de Tapachula. (SvelteKit, JavaScript)

Full details at [enagarlol.github.io](https://enagarlol.github.io)

## TECHNICAL SKILLS

---

**Backend:** C#, .NET and ASP.NET, Entity Framework Core, Node.js, Express, Prisma, REST APIs, gRPC

**Frontend:** TypeScript, JavaScript, Angular, React, Svelte, HTML, CSS and SCSS, Bootstrap

**Desktop and mobile:** WinUI 3, MVVM pattern, Kotlin

**Databases:** SQL Server, T-SQL, PostgreSQL, MySQL, SQLite

**Testing and tools:** xUnit, NSubstitute, FlaUI, Git, GitHub, Keycloak, JWT, QuestPDF, EPPlus

**AI-assisted development:** Claude and Claude Code, Codex, ChatGPT — support for implementation, refactoring, code review and documentation, with my own validation and tests on every delivery

## EDUCATION

---

**B.Eng. in Software Engineering**

Graduated: December 2023

Universidad Politécnica de Tapachula · Chiapas, Mexico
